ABOUT ME

Passionate Full Stack Developer with 5 years of experience in building responsive, client-centric websites and scalable web applications. I specialize in creating seamless user experiences and developing dynamic front-end and back-end solutions.

PROFESSIONAL EXPERIENCE

Full Stack Developer

JAST Media - Wilsonville, USA (Remote)

2023 - Present

- Developed client-centric, responsive websites using WordPress, HTML, SASS, and jQuery, ensuring seamless user experiences across devices.
- Implemented custom themes and plugins through WordPress Hooks, PHP, and AJAX, tailored to meet specific client needs.
- Collaborated with cross-functional teams to deliver projects on time, maintaining quality and performance optimization throughout the development process.
- Integrated third-party APIs and e-commerce functionality to streamline client workflows and enhance customer engagement, using WooCommerce and Shopify.

Front End Developer

Freelancer - Hermosillo, Mexico

2021 - 2023

- Built and deployed MERN stack applications to meet client specifications, using React for dynamic user interfaces and Node.js for efficient backend processing.
- Utilized Material-UI to create intuitive and responsive UI designs that enhanced user experience and functionality.
- Collaborated with clients to define project goals, managing end-to-end development from initial concept to final deployment.
- Ensured applications were optimized for performance and accessibility, adhering to web development best practices.

Full Stack Developer

Congreso HELA - Hermosillo, Mexico

2020 - 2022

- Led the complete redesign and migration of the official website, improving performance and user engagement through the use of HTML, CSS, and JavaScript.
- Integrated WooCommerce and MercadoPago to enable the sale of membership cards, ensuring a smooth transaction process for users.
- Managed hosting, domain configurations, MySQL databases, and version control with Git, ensuring site reliability and uptime.
- Built custom plugins and automated email notifications to streamline processes.
